### Interactive White Boards

Interactive whiteboards bring a new dynamic presentation and teaching tool into boardrooms and classrooms alike.

IWB's enable teachers and presenters to compile resources from a wide range of media, create interactive slide shows and enhance the learning environment for their students.

As schools, universities and companies continue to adopt interactive presentation technologies, installation companies are being swamped with work. While this is great for the AV industry, it is stretching the resources of these businesses to their limits.

Installers and dedicated sales people are harder to find and less experienced workers taking more time to train.

If the training schedule is reduced and on-site installation time is cut down by 25%, this would make the staff more efficient and save your company money.

Dueltek Computer Products offers a do-it-yourself IWB (Interactive White Board) Kits, which will make any installation fast, precise and give a professional finish that will generate repeat business.

These IWB Kits are a great solution for any business trying to increase productivity and maximise staff output because they come complete with all the components required to have a professional looking installation.

## 01 TBUS - 1 Rectangular - Advanced Table Mount Management System

**KRAMER ELECTRONICS**

The TBUS-1 lets you connect any equipment to the room's presentation system installations via cable accessor passive interfaces.

By default, the mounting surface includes a universal power supply, two cable pass-through plates and four blank plates for optional video, audio, telephone and network connections.

Any of the plates mounted to the Connecting Surface can be rearranged or removed and replaced with Kramer passive wall plates or connector modules for interfacing AV type signals. When the cables are not in use, they can be stored inside the unit, covered by the lid and out of sight.

#### Features & Benefits:

- Ideal for boardrooms, conference and training rooms
- It is modular in design, letting you tailor it according to your needs
- Features a universal power socket, suitable for any power receptacle
- Has a black-textured lid with a special opening for cable pass-through
- Dual AC and other local AC are available - Call Dueltek for more info

#### Specifications:

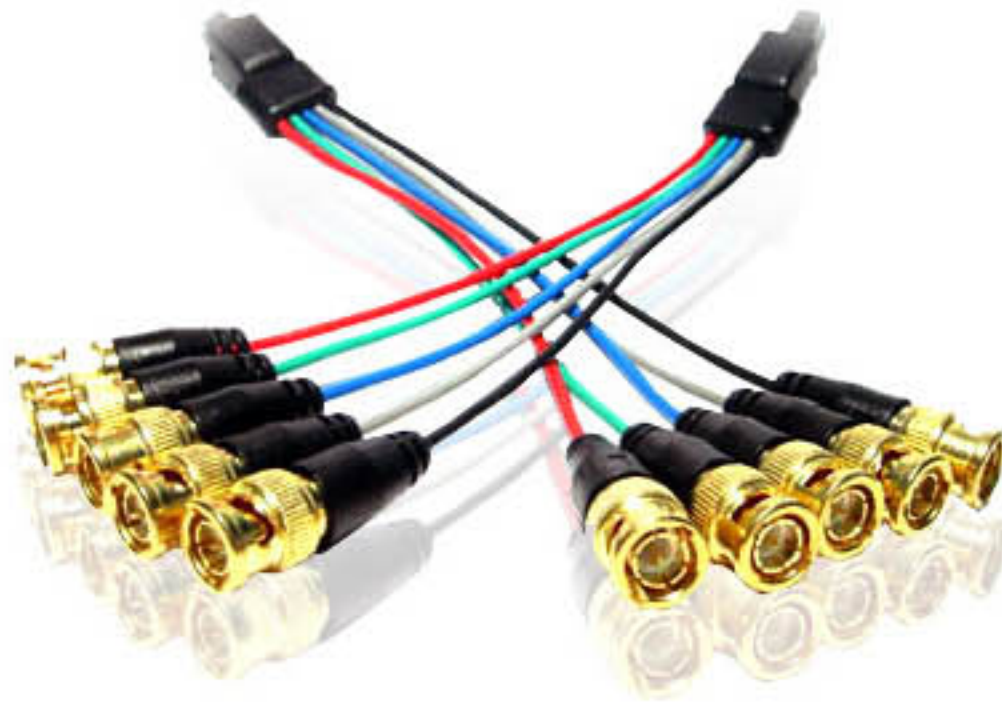

- ACCESSORIES - Power cord, six self-locking ties
- DIMENSIONS - 20.7cm x 14.9cm x 13cm (W, D, H.)
- OPTIONS - Passive wall plates and interfaces
- POWER SOURCE - Universal power socket
- WEIGHT - 1.15kg approx.

## 02 RGBHV Mini Coax Cables Red, Green, Blue, plus Horizontal and Vertical sync

Dueltek's 5BM series cables are constructed of 5 mini coax cables in a single jacket with 75 ohm BNC connectors at each end. They offer outstanding quality, durability, and high performance for any RGBHV video signal application.

5 x BNC cable includes five 28 AWG 75 Ohm mini-high-resolution coaxial cables, pre-terminated with 75 Ohm BNC male connectors, each coax colour-coded. A RGBHV signal splits the video signal into five cables (Red, Green, Blue, as well as Horizontal and Vertical sync).

- Gold Plated Connectors
- RGBHV (on BNC) Male to Male Cable
- Double shielded cable construction minimizes EMI and RFI interference to maximize picture clarity
- 95% tinned copper spiral, 100% aluminium / polyester foil
- Supports High Definition video connections over short and long distances
- Terminated with high quality BNC connectors with gold plated pins for optimum connectivity
- Lead Free, "silver laced" solder is used in order to reduce loss and maximize conductivity
- Lifetime warranty
