Dueltek Pty. Ltd. Unit 2, 35-43 Lacey Street Croaydon, Victoria 3136 Phone: (03) 9725 1911 Fax: (03) 9725 1126 Email: sales@duelttek.com.au

CEDIA Member Duelttek Distribution is proud to announce the launch of not one, but three new product lines which are now available.

1 - IS Link - Small range of IWB and Audio Visual products including a digital powered amplifier and speakers.

2 - Vision - Offering a full range of AV installation solutions including Modular Wall Plates, Amplifiers, Speakers and Projector Mounting accessories.

3 - PTN - Manufacturers of quality AV switches, distribution amplifiers, processors, scanners and scalars.

"We are pleased to offer these new products to compliment our current range of AV cables and accessories," says Gary Herzig - Managing Director. "Dueltek is always striving to bring high quality products to the Australian Market, and these brands certainly fit into that category".

01 NEW PRODUCT DPA-22 Digital Power Amplifier 

When the previous analogue version (MPA-20) was released back in 2008, nobody had any idea how popular it would become. So to build on that success and after consultation with many installers, IS-Link has designed the new DPA-22.

By upgrading to a digital platform, the DPA-22 provides power delivery and efficiencies not possible with an analogue amplifier. The DPA-22 only uses power when it is amplifying, runs cold and is half the size of the MPA-20.

The DPA-22 also comes with multiple inputs, RS232 and the option of IR or contact closure remote.

FEATURES

- Class D Digital Platform
• 2 x 20 watts (RMS) per channel @ 4 Ohms output
• 1 x 40 watts (RMS) @ 8 Ohms (Bridged Output)
• 2 x Line Level inputs (1 x RCA and 1 x 3.5mm)
• 1 x Mic level input (with mix function)
• RS232 Control
• IR and Contact closure remote options
• Output switchable stereo/mono/bridged
• Line level output
• Separate Power Supply (Included)
• 3 Year Warranty

02 NEW PRODUCT TCAU-3 - Modular AV Wall Plate 

The Vision Techconnect range of modular wall plates feature an attractive architectural front surround system making it suitable for corporate and home-cinema applications, plus robust clip-in modules which make it super-quick to install and flexible. It allows seamless integration of connectivity, audio, and control.

Plug-In Cables - Modules now feature plug-in connectors on the rear. Cables come pre-terminated with male connectors which are simply plugged into the rear of the module. Need to shorten or pull a cable? Just unscrew the phoenix connector. These plates give you the speed of a pre-terminated system with the flexibility you sometimes need.

Quick and Easy - Simple enough that even an inexperienced technician can install it. No soldering is necessary due to its phoenix connector captive screw design. The modules are interchangeable, so if in the future you require a different connector to be installed, you can simply buy just the module you want and swap it out.

TCAU-3 MODULE PACKAGE

- 1 x 1-Gang AUS Surround (accommodates 3 modules)
• 1 x 1-Gang AUS Mud ring
• 1 x VGA with 3.5mm Mini-jack Module
• 1 x USB (B-type on front) Module
• 1 x 3-RCA Composite Module (Red, White, Yellow)
• 1 x Blanking panels Module
• Clipsal 2000 compatible hole spacing

NOTE: Kit also included interchangeable Blue and Green rings for RCA connectors should you need Component (Red, Green, Blue) coloured connectors instead of Composite.

03 NEW PRODUCT VGA-USB-AUDIO 2 x 1 Switch 

The WVG2A-USB is PTN's flagship product in Australia. A VGA and USB 2 x 1 selection switcher, which enables easy manual or auto switching between two computers, two interactive white boards or any other Video/USB sources with stereo audio. It is compatible with PC resolutions up to 3200x2400@60MHz, including HDTV, and it is also USB 2.0 compatible.

The PTN WVG2A-USB is a high performance device for the video conference rooms, educational facilities, control rooms, monitoring centres, government institutions and boardrooms.

FEATURES

- Super bandwidth, 1GHz (-3dB). QUXGA, up to 3200x2400@60MHz
• USB 2.0 compatible, high bandwidth for data transmission
• Auto-switch function. Detecting the H/V signal of the computer graphics, and switching automatically
• Working compatible with the PTN contact closure (WP2)
• RS232 serial control port. Public command
• 2 buttons in the front panel, for controlling
• Built-in Gain compensation and synchronization signal proofread technology
• Audio following switching, sync-switching with the video
• Static resistance case with protection
• Internal international power supply (100Volt~240Volt AC, 50/60Hz)
• For worldwide compatibility, all models are equipped with an internal, auto-switching power supply that meets or exceeds all appropriate safety certifications
• Wall/Table-mountable aluminium enclosure, PT case design
• Front panel LED indicator. It will show you the working status
